

14 July 2003

Roof rubber strips pre applied with double sided tape are then applied to vehicles in anticipation of the addition of a roof rack system.

Use of Acrylic Double Sided Tape for bonding existant rubber for models V40, V70 and XC90. Satisfactory results were obtained using (Acribond) VST 6110G Tape.

Before applying tape, clearcoat brushed with a mixture of IPA and water 20/80 mix.

Testing Conditions

Climate change:	10 cycles
Moisture ageing:	1000 hrs (Florida Test)
Warm ageing:	2000 hrs
